

# Trace Minerals in AQUAMETICS

## Skin, Hair and Nails support from 12 of the 84

**Boron:** Supports healthy estrogen levels. Estrogen plays an important role in maintaining healthy skin.

**Chromium:** Reduces skin irritation such as psoriasis and acne.

**Calcium:** Provides firmness and elasticity for the skin as well as all tissues and cells of the body. A calcium deficiency will result in fragile and thin skin, loss of hair, weak bones and brittle nails.

**Cobalt:** Essential in the function of Vitamin B12 which is important to rapidly dividing cells such as skin cells.

**Copper:** Works together with Zinc in the formation of collagen and Vitamin A to form elastin important to skin.

**Manganese:** Increases the activity of the antioxidant enzyme (SOD) responsible for preventing the superoxide free radical destruction of cells.

**Magnesium:** Aids in bone growth and strengthens nails and tooth enamel.

**Potassium:** Works with sodium to maintain proper body fluid distribution to the cells.

**Selenium:** A major antioxidant which protects cells and preserves tissue elasticity and youthfulness of the skin.

**Silica:** Necessary for the formation of collagen, improves the elasticity & skin thickness.

**Sodium:** Important in maintaining a proper pH balance in the body and in facilitating the transmission of nerve impulses.

**Sulfur:** Sulfur is the third most abundant mineral in the human body, present in every cell, with its greatest concentration in hair, skin and nails.

**Zinc:** Essential to the proper function of many enzymes that include those involved in bone, tissue growth & repair.

## What's In Your Water?

Today's drinking water, both tap and bottled lack essential ionic trace minerals. There are arguments from both medical professionals and the water industry as to which type of drinking water is best for consumption.

Water filtration systems using distillation and reverse osmosis may remove these beneficial minerals. However, drinking tap water without filtering it first is not a good idea either since it can contain very harmful chemicals such as chlorine, fluoride and lead, to name a few. Additionally, bottled water companies are now required to filter their water before distribution.

After researching the positions of both sides on all types of drinking water, it has been determined that you will benefit from adding our trace mineral formulation to your filtered, tap or bottled water. One bottle of **AQUAMETICS** fortifies 60 glasses of water, or any other beverage, for a fraction of the price of mineral water.
