

Why Supplement with Collagen?

Collagen is the most vital building block for the skin. It makes up to 30% of the protein in our body and up to 75% of the protein within our skin. Collagen helps our skin stay toned, supple and youthful.

Independent studies have shown the body's collagen levels start to reduce by the rate of approximately 1.5% every year after the age of 25. But after 45 years old, collagen levels fall by approximately 30%, which can significantly intensify aging.

It is a fact that as we age, our skin loses its youthful flexibility and resilience. This loss of tone and elasticity is greatly due, among other things, to changes in the skin's ability to integrate collagen structures.

Collagen-based loss of resilience has many aging effects on the body. We readily recognize the most visible sign, which is wrinkling of the skin and loss of radiance.

There is no molecule more important to the youthful strength and resilience of skin, hair and nails, than collagen protein.

Many recent studies have shown that the benefits of consuming hydrolyzed collagen improves skin hydration and reduces the number of fine lines and deep wrinkles, compared to placebo.*

Collagen Supplementation is easy, effective, inexpensive and has many additional health benefits.

Age Fighting Benefits of Collagen Supplementation

Beauty Benefits

- Reduce Wrinkles
- Create Firmer, Smoother, More Radiant Skin
- Promote A Lustrous, Even-Toned Complexion
- Regenerate Healthy Skin Tissues
- Build New Skin Cells
- Strengthen Nails
- Support Thicker & Stronger Hair

Additional Health Benefits

- Bone & Joint Health, Digestion, Brain Function
- Weight Loss, Cardiovascular Functions, Detoxification
- Immune Enhancement, Muscle Repair, Energy Creation
- Extended Longevity & All Metabolic Functions

COLLAGEN 360 A Superior Source

COLLAGEN 360 is most effective at helping to restore collagen because it contains full spectrum concentrations and ratios of amino acids needed to build a complete collagen molecule chain.

COLLAGEN 360 is made up of very specific amino acids that are often lacking in our modern diets, including ample amounts of glycine, proline, alanine & hydroxyproline, the amino acids primarily responsible for forming collagen.

COLLAGEN 360 supplies the correct quantities and ratios of these amino acids to create the complete collagen molecule chain.

COLLAGEN 360 is hydrolyzed which assures the highest level of absorption allowing the complete collagen molecules to be transported to the dermis of the skin more effectively.

COLLAGEN 360 is made from wild-caught, deep sea fish. Our hydrolyzed collagen far exceeds the purity standards of the United States, Europe, and Japan.

COLLAGEN 360 is finished in our USA lab following strict cGMP quality standards.

COLLAGEN 360 is pure Collagen Protein and mixes easily with water or any of your favorite hot and cold beverages.
