

## A Simple Analogy

The relationship between collagen and smooth healthy skin can be compared to the relationship between a box spring and a mattress.

The collagen strands act as the springs in the box spring. Once the springs begin to breakdown the mattress begins to sag in that area. These sags would be the equivalent of wrinkles in the skin once the collagen strands begin to breakdown.

## How Collagen Supplementation Works

Collagen is the long-chain of amino acids that builds our skin, connective tissue and bones but cannot be absorbed through our diet. It is made primarily of four major amino acids; glycine, proline, alanine and hydroxyproline which gives it unique functional properties different from all other proteins. This also makes it the most important structural protein in the body.

To understand the difference between collagen versus collagen peptides, it is important to understand that collagen peptides are made by breaking down the full-length collagen molecules.

They are made of the same amino acids as collagen, but they have different properties. Collagen peptides are more bioavailable because they are much shorter chains of amino acids than collagen. Because they're shorter, collagen peptides are more readily broken down into a form that can enter the bloodstream upon digestion.

After absorption, collagen peptides travel throughout the body, repairing, rebuilding and providing energy. Collagen peptides are shuttled to the different tissues where cells will build the peptides into full-length collagen helices to repair our skin, bones and joints, or the cells can use the amino acids directly for energy.

# COLLAGEN·360™

AC MARINE PEPTIDES

Skin

Hair

Nails

Joints

Citrus Flavor  
NUTRITIONAL SUPPLEMENT

**COLLAGEN 360 Hydrolyzed Marine Peptides** have been selected for their unique ability to deliver benefits to the vital collagen structure of **Skin, Hair, & Nails**. They are highly soluble, digestible and absorbable, therefore readily used by the body.

**CONTAINS NO: Soy, Wheat, Lactose, Yeast, Gluten, Preservatives, Antibiotics or Hormones.**

**NON-GMO • Made in the U.S.A.**
